

A schematic diagram of a rectangular loop. The loop is formed by four green lines. At the top center of the loop is a battery symbol, represented by three vertical lines of increasing height. On each of the four sides of the loop, there is a label: "1x50 mm²" followed by "NU" below it. The labels are positioned at the top, left, right, and bottom centers of the respective sides. A green line extends from the left side of the battery symbol to the left edge of the diagram.
